A simple shelf bracket with a honeycomb pattern!

Here you can find two more designs I made from this shelf bracket.

240 by 200mm. Take the long or short side up. You can also simply scale the shelf bracket. The holes have a diameter of **5.5mm**, the blind hole **13mm**. If the bracket is scaled down, the hole may need to be drilled. So make sure that there is enough wall thickness.

Please leave a **like** if you enjoy my design. Also feel free to **check out my other uploads.** :)
