3D Miniature of Midtown Manhattan!

Collection of all my miniatures: <https://www.printables.com/@jarvizar/collections/1124416>

I have many other exclusive miniatures available for free on **MakerWorld!**

Lower Manhattan miniature:

<https://www.printables.com/model/701236-new-york-city-lower-manhattan-3d-miniature>

Larger version including more of Manhattan:

<https://www.printables.com/model/731327-new-york-city-manchattan-large>

Model boundaries are 3rd Ave. to 8th Ave. and 30th St. to 56th St.

Notable included landmarks:

- Empire State Building
- Times Square
- Madison Square Garden
- Chrysler Building
- Rockefeller Center
- Grand Central Station
- Bryant Park + New York Public Library

Printing & Slicing Details

This model was designed to be printed with a 0.4mm nozzle and 0.16mm layer heights.

Try using a 0.2mm nozzle (0.08mm layer heights) or scaling up for even finer detail!

Note: If roads or smaller details disappear after slicing, try lowering the extrusion/line width of external perimeters (outer walls) closer to 0.4mm OR **use Arachne walls**. Can also enable the “Detect Thin Walls” setting.

Framing Details

This model measures almost exactly **6.7in by 4.7in** (170.5mm X 119.5mm) and should fit most 5x7 frames (assuming frame lip/overlap is around a quarter inch). Feel free to change the scale/size of the model(s) to meet your needs.

Personally I use these cheap frames from Amazon: <https://www.amazon.com/dp/B0C8HY7YSQ>

And blue printer paper: <https://www.amazon.com/dp/B00006IDQT>

I also included a **fully printable frame** (including a 1mm thick water plate) designed to fit all my miniature cities.

A frame is not required! This model looks great by itself and can be displayed almost anywhere.

Other Details

Model created in Blender using the [Blosm](#) addon.

See my [Patreon](#) for a commercial license, early downloads, polls towards future models, and more!
