Summary

Simple and easy to print phone stand holder.

Tags: [holder](#) [stand](#) [phone](#) [octagon](#)

Printed mine in PETG but PLA will work as well.

Print normally or with zero top layers, 4 bottom layers, 4 perimeters to show off the infill. I like the honeycomb infill the best. Do a color change at layer 5 to make it really pop!

More infill percentage=more octagons! (or whatever you fancy!) I used 10% infill.
