Summary

A threaded egg to hold your dragon

Tags: [dragon](#) [egg](#) [threaded](#)

This is a large threaded egg. It was designed to be large enough to hold one of [McGybeer's articulated dragons](#) (printed at the default size). Looks particularly good in multicolor coextruded filaments.

It will print OK without supports, but the bottom points of some of the scales get a bit messy.

Update 12/25/23: Uploaded separate top and bottom .3mf files

Update 1/6/23: Added a revised version with a wider base, which dramatically improves the print quality of the lower layers
