Simple Case for the Raspberry Pi5 that prints easily and looks great. There is provision for the **official active cooling**.

- No supports required
- Snap fit no screws required
- Can be securely closed with M2.5x8 countersunk screws (optional)

This design is specific to the official Raspberry Pi Active Cooler, other fans may or may not fit into the design.

If you would like a top cover to accommodate your 3rd party fan, please share the details of your fan and I will try to create a suitable model as an option for the top cover.

I have decided to make the **onshape document** available. Please ensure that you add your remix if you use this.

While this is my own design, I drew inspiration from <https://www.printables.com/model/642650-raspberry-pi-5-case-snap-fit> and would like to recognize **pyrho** for his nice design.
