Summary

It's a headset and controller stand for the Meta Quest 3. This is a remix of two models available online.

Tags: [stand](#) [controller](#) [headset](#) [meta](#) [quest3](#)

I wanted to print an all-in-one stand for the Quest 3 but most were either headset **or** controller stand options. This is a combination of my two favorite options available online.

I printed this on the Bambu P1S. The footprint of the model is slightly larger than the 256x256mm bed so I had to orient it vertically to print. I printed the model in the pictures above with the following settings:

- Nozzle: 0.4mm
- Layer Height: 0.24mm
- Infill Percentage: 5%
- Infill Pattern: Gyroid

This remix is based on
