Mount your Airsense 11 CPAP machine to the wall to free up night stand space.

Water reservoir is easily accessible.

Incorporates hooks for holding the tube up.

I printed this on my Ender 3 V2 with .28 resolution, 3 walls, 5% infill, using organic supports.

Print with hook side down on the print bed.

Mount with screws of your choice.

Designed using Tinkercad.

25 Jan 2024 - New file added with hooks on the left hand side.
