When I did a big upgrade to my CNC router I needed a bigger drag chain. Since I couldn't find an existing one that I like I designed my own. I really wanted to have removable closing clips and that's also the main feature of my design.

Here's the link to the video where I use the chain: <https://youtu.be/IF8U8nd5oSM>

It's very easy to print and I could use the stock settings of my Prusa mk3 (0,2mm speed)

Print Settings

Printer Brand:

Prusa

Printer:

I3 MK3S

Rafts:

No

Supports:

No
