Sharkfin pick

Famously played by The Beatles, the Skarfin pick provides different sound depending on the edge you use to play.

The side with 5 bumps can be used to get more attack on the string, both during strumming and single string picking. You'll be hitting the string multiple times at once, getting extra crunch.

The fin works great with acoustic and creates a more mellow/heavenly sound.

You can quickly switch between strumming and fingering, as the pick neatly tucks away under your index finger, thanks to the fun curve.
