Summary

A radiator shelf to have some more space to place things.

[Household](#) > [Bathroom](#)

Tags: [shelf](#) [shower](#) [radiator](#)

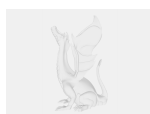

I made this model to have some more shelf space in the shower.

This was a first try model. The connection piece may need a bit of cutting to make fit.

The pipe it connects around is 34mm x 34mm

Seperate step-files added tot make adjustments easy
