Summary

Keeps your page, holds your tea cup and stores your phone.

Designed for my wife, who likes reading books and drinking tea. Added a phone stand and charging cable clip as a bonus.

Straight forwards enough to print, shouldn't need supports. The insert parts can be printed in a different colour to the base/frame parts. I used a purple silk PLA.

All the parts should press fit, although YMMV and may need a bit of sanding or glue.

Maybe a little bit niche, but thought I'd upload it in case it was of use to someone else. Happy reading/tea drinking!
