Tags: [flower](#) [stem](#) [rose](#) [extender](#) [extension](#)

@Olafejs did a really good job with the Better Rose Stem.

<https://www.printables.com/model/136424-better-rose-stem>

It looks great with the Spiral Vase Rose.

<https://www.printables.com/model/131488-spiral-vase-rose>

If you have already printed the Better Rose Stem and would like to make the stem longer try my BRS Extensions with Adapters.

I recommend printing the BRS Test Adapters. That way you can see which size fits your stem the best.

If you haven't printed the Better Rose Stem yet try my remix with dowel rods.

Please post pictures!!

Printer Settings

Layer Height - .2

Perimeters - 2

Minimum Shell Thickness Top and Bottom - 1mm

Seam - Random

Infill - I like to use 0% for transparent filaments but you can use whatever % you like.

Brim - You might need to use a Brim for some of the taller stems.

If the dowel rod is a little too small or a little too big try increasing or decreasing the XY by 1 or 2%.

Filament used in the pictures.

Printed Solid PLA Jessie Green Ice
