Summary

cap for the A2's headlight.

[Sports & Outdoor](#) > [Outdoor Sports](#)

cap for the A2's headlight.

its meant to replace the stock threaded cap.

this model is not threaded, but it fits tightly in the headlight thread

it needs no supports to print

I have only tested it in ABS and PETG. PLA and TPU should also work fine

any infill will do also (I've printed mine with 20%)

Hope it helps someone :)
