Summary

This is not intended to be printed directly - but instead as a helper to model screws for the multiboard.

[Hobby & Makers](#) > [Organizers](#)

Tags: [screw](#) [bolt](#) [multiboard](#) [keepmaking](#) [multiboardremix](#)

Important note: Multiboard now includes official STEP files, I recommend to use those instead: <https://www.multiboard.io/parts-library/remixing>

Description: This is not intended to be printed directly. But I wanted to add bits to my multiboard (see <https://www.multiboard.io/>) and thus needed to model the screws (sadly there are not real STEP files released yet).

So this is for everyone to get on the ground running faster.

In addition to the STEP file I also included a PDF containing all the dimensions I used.

Credits to Jonathan ([KeepMaking](#)) for creating [multiboard](#)!
