Holder for children's knife and peeler - Ikea SMÅBIT, so they can help you in the kitchen.

Printing instructions:

No special settings are needed, just use your favorite. The model is designed for easy printing with back side on the plate. The orientation is shown in the next picture.

There is a small part where the peeler is that needs support. There is a file with support already added in the model which you can just break off after holder is printed. There is also a file without support so you can use supports in the slicer with your favourite settings.
