Summary

The child of our Christmas suffered losing fingers during her 56 years career in the Christmas Crip.

During my campaign collecting all kinds of hands for probable major injuries of people in our X-Mas crip I forgot the origin designer of the hand. I apologize for calling this make MY ORIGINAL MAKE. Sorry.

But I had to resize and elongate the arm, so it is indeed my hand so far.

Fingers were lost of the child, so I replaced this by new hands. 56 year old child is happy again.

Designed by TinkerCad, printed in PLA on my Prusa MK4. After two hours the child could use all ten fingers again. LOL.

There is sooo much that you can repair, just try it out! Happy printing!
