Originally based on the fan from the YouTube “white-fan noise” video as a joke gift for a friend, this little model resembles a wind-mill and can hold your AirPods in place on your desk while also giving you a little fidget toy in the form of the fan.

You can snake a lightning cable up through the fan to enable charging of the AirPods. Note that the model is sized for an Apple lightning to USB-C cable, so other cables may not work. But the model will hold any AirPods even without a charger cable.
