Tags: [parametric](#) [box](#) [airgun](#) [competition](#) [loader](#) [pellet](#) [ammunitionbox](#)

Airgun pellet box for 4,5 mm (.177) ammunition.

It's an attempt to replicate competition box that are expensive with one that should achieve the same goal with a speed filling mechanism.

Update

The staggered version is now available.

Version 2: new design closer to standard boxes but still not tested.

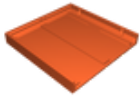

Caveats

The number of columns should be even because of the staggered lines to avoid weird results.

Disclaimer

I haven't tested any of the models yet, and it may need some adjustments or maybe it just doesn't work.
