Summary

Ikea used to use a slightly shorter height for their desk legs, for old legs with the new drawers you want this adapter.

Ikea used to use a slightly shorter height for their desk legs, for old legs with the new drawers you want this adapter. This will keep your desk level and solid.

Printed with PLA and 50% infill and increased the hotend temperature just a touch to increase layer adhesion for the “wings”.

I have added v2 with the correct length for the wings - doesnt bother me on mine so I have them still to long.

Will fit over a 25.5mm bar and raises the side of your desk by 21.5mm.
