Summary

Bobbin for the bottom thread of sewing machines (compatible with 400 and 500 series of Bernina).

Tags: [spool](#) [thread](#) [sewing](#) [bobbin](#) [bernina](#)

I would suggest to print the top and bottom part of the bobbin separately (split parts provided) and glue them afterwards (no support required). Or print the whole bobbin in one piece (support material required).

I printed in PLA, 0.2 mm layer height.
