Greetings Diabetics

I made a box for insulin pens.

The Box should be compatible with all insulin pens up to a diameter of 20 mm and a height of up to 160 mm.

I will soon add an extended model with a pocket for two insulin needles.

I added one model with the inscription insulin already created, I left the other without text. You can basically put whatever you want on it.

If you are not an experienced modeler, do not hesitate to contact me. I will edit the text for you. It's not even a problem for you to make a box directly according to your ideas.

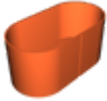

I'm also diabetic. I plan to do more similar boxes and other tweaks. I will gradually add them to my profile.
