[citadelpaint](#) [proacryl](#)

Paint holder for mini paints for the Skadis / Skådis system, three versions that fit either vallejo (or others of the same size), citadel or pro acryl.

The dropper bottles (vallejo and pro acryl) fit either standing normally, or upside down if you want - this can help keeping air out of the bottles.

Each holder is 178 mm long, so it fits on the MINI/MINI+ print plate. The vallejo one can go four per build plate (five on a Mk3/Mk4). The others are

a little wider to fit the bigger bottles so they go three (four on Mk3/Mk4) to a plate.

Print them with three perimeter walls and at least 15% infill to make sure that the connectors are structurally sound.
