A nice little lamp to illuminate your beverage of choice. Designed to accommodate most 16oz bottles.

I designed this lamp to use the LED module out of a cheap 9 LED flashlight which uses three AAA batteries. If you would like to build your own, this would be a good candidate: <https://www.aliexpress.us/item/3256806213547905.html>. I chose to solder the LED module to a USB cable with a current limiting resistor so that the LEDs don't get overpowered and burn out, but other approaches could be taken.

Happy printing!
