A nice and simple case for a power supply module with banana plugs and an output fuse.

The power supply unit which this is based around can be found here: <https://www.aliexpress.us/item/3256805327509247.html> and the fuse block and banana plug terminals can be found here: <https://www.aliexpress.us/item/2251832814885002.html>, and here: <https://www.aliexpress.us/item/2251832723251818.html>, respectively.

This design also requires four M3 heat set inserts to be installed in the case, which holds the cover with matching M3 cap head screws. The fuse block is also installed with M3 screws, which are threaded directly into the cover.

Both models require supports.

Happy printing!
