Summary

Simple Monitor Stand/Riser

[Gadgets](#) > [Computers](#)

Tags: [desktop](#) [stand](#) [computer](#) [monitor](#) [riser](#)

My monitor was to low for me. So I created a simple riser.

I printed it in 0.28mm with 5% infill and 3 walls. I used some cheap white PLA because it need just to be functional.

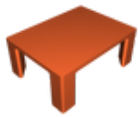

You can adjust for your need in the slicer.
