This is a backing plate that uses the belt clip for portable radios used by firefighters to attach a shoulder strap, this replaces the usual leather or nylon holster that holds the portable radio. It is designed for the Motorola ATX4000, but should work with other brand portable radios. Needs a leather or similar shoulder strap.

Parts you will need:

- 2 - M4 x 8 screws
- 2 - M4 lock washers
- 2 - M4 nuts
- 2 - D-rings (<https://a.co/d/8OK7xfm>) This is not an affiliate link.

I printed with Black ABS for final print, could use filament type and color of your choice.

\*This is not designed to be used by firefighters entering a structure fire. I am not responsible for improper use.
