Summary

Replacement feet for large Synology NAS systems to better absorb vibration

[Gadgets](#) > [Computers](#)

Tags: [feet](#) [damper](#) [vibration](#) [synology](#) [ds1618](#)

My Synology NAS was making too much noise from vibrations so I remixed a Bambu Lab vibration dampening foot to work with the large Synologies.

I printed in 95a TPU, but PETG could be a viable alternative as well if printed without the rib. I've included that model here as well.

Uses the same screws and washers from the stock feet. Fits my DS1618+, not sure what other models it works with.

This remix is based on

Bambu X1 vibration damping foot
