Summary

Adapted version of the original insert and plug designed for the Honeycomb Storage Wall for edgcase use.

[Hobby & Makers](#) > [Organizers](#)

Tags: [plug](#) [insert](#) [middle](#) [honeycombstoragewall](#) [hsw](#)

This is an unconventional middle insert and plug option designed for optimizing a tight HSW Wall. Alternatively, it can be used to fill empty spaces or to accentuate the top or bottom edge of your wall.

These inserts and plugs are primarily created to modify HSW models found [here]. To use them, you'll need to remove the original insert or plug connector in your slicer and replace it with these.

This remix is based on

Honeycomb storage wall
