## Summary

This push stick has an 8° angle only and allows you to fit under the low ceiling of a small band saw

Tags: [bandsaw](#) [stick](#) [saw](#) [pushstick](#) [push](#)

I needed a push stick that would have a small enough angle to fit under the low ceiling of my band saw.

### HOW TO PRINT:

I printed on 4 perimeters and 40% cubic infill it seems more than sturdy enough.

This model was designed from scratch by me but i took many dimensions from the original which inspired me so i added it as a remix.

## This remix is based on

## Push Stick for table saw
