A mountable playmat holder that you can screw up on your wall or shelf to store your playmats. Great for collectable card games like Magic the Gathering or Android Netrunner.

I've included 3 versions.

Playmat Holder - A completely circular one. Consider it a bottom piece, and an optional top piece.

Playmat Holder Cut - One where one of the edges is cut out, making entry easier. Can be used as a top or bottom piece.

Playmat Holder Open - A hole straight through. Useful for top parts, or if you want additional support along the way.

I've also included several sizes in case you have smaller or larger playmats.
