### Summary

Shroud to fit over the screw housing of your cooling part fan. This part will help hold it together if it's splitting.

I designed this because my fan housing started to split at the screw attachment point. Even though I added a washer it was still splitting wider over time with the washer. I figured it needed outside support and designed this to not only support the front but the outside as well.

Quick and easy print. It took six minutes to print on my MK3S+ for a single one. Front shell is 1mm and side shell is 2mm.
