A box to print multiple times to contain a set of sleeved cards for Innovation Deluxe Edition.

I use Paladin Sleeves (90 microns thick) and it fits perfectly.

The same piece is used for the bottom container as well as the optional top part. If you only store it horizontally and don't plan on carrying it to a game night, you don't need the top parts.

I printed 4 extra pieces in a neutral color to use as spacers in the box.

Print time about 2h with 20g filament per piece.

Unfortunately I didn't make the box perfectly square (poor planning when creating the model), so it's slightly rectangular. There's always room for improvements, but this worked well enough and I didn't want to reprint them just because of that.
