Summary

This is my first draft, made in Tinkercad. Just print one bracket twice, or the one with the Dongle Holder

This is my first draft, made in Tinkercad.

Just print the same original bracket out twice, or both including the dongle holder

I moved the top/side bracket back a bit (when mounting to the wall), so that the keytar won't fall out easily, but how you install it is up to you.

The angle on the Keytar is @ 15/16 degrees if that helps.
