Summary

serial plate that going on the skirt without clueing or re printing

[3D Printers](#) > [Voron Parts & Upgrades](#)

serial plate that clips on to the skirt of stock voron skirts it is designed for v2.4 350 but if you what to i can remix it for 300 or 250

print settings "its not functional part so go nuts "

i included plane background one you can add the serial in you preferred slicer

also step files are included so you can modify it as you wish

i have re added 250 and 300 versions there are not tested due to me not having 250 or 300 voron 2.4
