Summary

A decorative shape witch appears square when looked from one side and round from the other side.

[Household](#) > [Home Decor](#)

Tags: [shape](#) [ambiguous](#)

A decorative shape witch appears square when looked from one side and round from the other side. Place it in front of a mirror and rotate it to see the strangeness of this shape. Based on Kokichi Sugihara's ambiguous figures.

For maximum effect you can print it in bicolor filament (like **3DJAKE magicPLA Deep Space**). Printed in PLA, 0.2mm layer, 2 walls, with support.
