This is a tray/case for the ANKER PowerWave Pad ( <https://www.amazon.co.uk/gp/product/B07DBX67NC/> )

The tray hasn't got a back support for the phone as this is design to fit the centre compartment of the Mercedes C-Class (W205) and this compartment's back holds it in place (the space is too tight)

If you wish to have it with back wall let me know and i'll add a file for it.

With this desing the compartment's lid closes and opens even with an iPhone 12 Pro MAX charging.

I realised with the smaller iPhones (XS) the charger was too far for the rear for it to be able to charge, i have moved it 15mm to the back on the V2
