An insert for a Sortimo L-BOXX Mini to store security your PINECIL Soldering Iron including some accessories.

I purchased the PINECIL with the Power supply as a set at AliExpress a while back.

Power Supply Model: XY-1389 C+A65W, it has a US Connector build in and comes with an German Adapter.

The file L-Boxx-Mini\_Pinecil-Lid\_clean.stl is for designing a different soldering iron mount (like the TS100).

If you've any question, please leave a comment.  
This is my first more complex project :)
