We own the [Playtive Wooden Streetset from Lidl](#). But we always hat not enough parts, so I just printed them.

But of course you can just use the printed ones, without the wooden ones.

Printed in [R3D PLA Filament in Matte Ash Gray](#), which looks perfekt, but is a bit prone to scratches.

The Streetmarker are embossed with just 0,01mm in the model, so the slicer will not at a high difference there, but the "smart fill" paint function will detect these signs. Or you can just use my precolores 3MF File for the Bambu Studio.
