Discover my collection of motorcycle-themed keychains! Each keychain features a unique design inspired by the world of motorcycles. From classic bikes to choppers, these keychains are perfect for any motorcycle enthusiast.

I think they would look better if printed in multicolor, but I have an entry-level printer and I am a beginner in the field of 3D printing.

To print them in two colors, I simply set a pause in the slicer (Prusa slicer does it automatically when it recognizes a logo) and changed the filament.
