Tags: [cord](#) [zipper](#) [zip](#) [zipperpull](#)

This two piece item joins the two ends of a cord - simply tuck the two ends of the cord into the inner piece and click it into place within the outer hood - now you have a handy thumb tab - great for zips on outdoor gear where you need extra grip - the inner can also be released by insert something into the two holes with either side and pulling.

Print Outer Case - Upright

Print Inner Clip - flat on bed
