## Bottle Holder

### General

This design should fit all your little bottles you use to store skin oils, tinctures and other serums.

The creation was made for my significant-other who has an obsession with skin-care routine and therefore tons of oils and stuff. The design perfectly fits [these bottles](#) from Amazon.

### About the print

I attached not only the STL file but also the FreeCAD and 3mf files. The FreeCAD files hold a spreadsheet that holds all the parameters so you just need to adjust the diameter of your bottles and the rest will be

calculated automatically. You can also adjust the gap to the edge or the gap between the bottles. The whole model will be re-calculated afterwards.

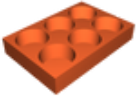

I included a “prototype” kind of model which you can print beforehand the check if the whole thing matches your bottles size and style wise.

For the prototype I just used 5% infill while the real model uses 10%.

If you need assistance or have other requests to improve / enhance / customize the model just let me know and I'll try to do my best.

## Model files

 **STLs** 2 files

 **serum-holder-body.stl**

 **serum-prototype-body.stl**

 **FreeCAD Files** 2 files

 **serum-holder.fcstd**

 **serum-prototype.fcstd**

## 3MF Files
