Summary

Redesign of the original Tea dispenser to support larger tea bags

[Household](#) > [Kitchen](#)

Tags: [tea](#) [dispenser](#)

Redesigned the awesome original to support larger tea bags from pukka for example and added "rails" on each side to keep multiple boxes together side by side. Boxes are also stackable.

Printing instructions:

- filament PETG
- 0,16 mm layer height
- with supports

Fusion 360 file added to allow changes

This remix is based on
