### Summary

A stronger version of my original Hex Soap Dish

[Household](#) > [Bathroom](#)

Tags: [soap](#) [soapholder](#) [soapdish](#) [soaptray](#) [soapbars](#)  
[soapdishholder](#)

Had a post in my shower a little lower than eye level from an old shower head that wasn't being used. This shelf fits over that 10mm post to hold my bar of soap.

This version addresses the design flaws of the [original](#). The shelf now has a tapered design so it doesn't bend under the weight of the bar of soap, as well as a lip around the perimeter to keep the soap from sliding off the shelf.

I printed this out of PETG instead of PLA so the heat from the shower is less likely to warp it.

Make sure when slicing it to place the flat underside of the shelf against the build plate.
