Summary

Massager for your cat. You won't believe how cats like this thing, it will ask for more for sure.

Print the body with PETG as it is flexible and sturdy. The wheels can be printed in PLA no problem.

It is better to print the body with a brim to ensure good adhesion to the bed.

You have to print 6 male and 6 female wheels.

Don't try to snap the wheels together before inserting it to the body, it is very difficult to disassemble after that.....

Have fun !
