updated 7. 1. 2024 | published 7. 1. 2024

## Summary

Suitcase handle holder for an older Samsonite suitcase.

[Household](#) > [Other House Equipment](#)

The handle of an old Samsonite suitcase broke because the drill holes were worn out (left on the first photo). I created the replacement part with Fusion 360 and share it here just in case someone also has the same problem.
