Introducing our Modern Wall-Mounted Propagation Tube Holder, the perfect solution for stylishly showcasing your plant propagation tubes. Crafted with a contemporary design, this holder adds a touch of sophistication to your space while keeping your greenery on display.

Measuring 6 inches in length, the holder features a sleek design that extends 2.25 inches from the wall, creating a visually appealing floating effect for your propagation tubes. The holder is compatible with propagation tubes of up to 1.5 inches in diameter, providing versatility for a variety of plant sizes.

Installation is a breeze with the two included French cleat style mounting brackets. Choose between the traditional method of drilling holes for a secure attachment or the convenient option of using a command strip for a damage-free installation. Whether you're a seasoned gardener or a

beginner in the world of plant propagation, our Modern Wall-Mounted Propagation Tube Holder is a must-have addition to your indoor garden setup. Elevate your greenery and transform your space with this functional and chic accessory.
