I designed this print continue practice in Fusion 360. It was specifically designed with my previous design, the futuristic pencil holder, in mind (which can be found among my other print designs).

The notches on the coaster platform are designed to support the spokes of the pencil holder. So its official name is: The pencil holder holder coaster pencil holder. Though I think that may be a bit lengthy for its display name.

Anyway, I will continue to make the pencil holder even more meta as I continue to add pencil holder parts to the original design.
