Summary

Fix for broken battery door on target 200 ecig

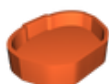

[Hobby & Makers](#) > [Electronics](#)

Tags: [batterydoor](#) [vaporesso](#) [target200](#)

I have a target 200 ecig with broken battery door which are not closing. I've created a print that can be used to hold battery door in place.

I've printed it in PLA 0.2mm infill 10% will be enough, 3 perimeters
