Summary

This knitting counter is really helpful to keep tracks of rows, patterns, etc. without having to put down the needles.

Tags: [knitting](#) [knittingneedles](#) [yarncraft](#) [knittingtool](#)

This knitting counter goes directly on the needle and is used to keep tracks of rows or patterns without having to put down the project to click or write the progress. When you're done with a row just slip the needle in the next hole on the counter and never loose your track again.

You can customize the label at the bottom to your need.
