updated 12. 4. 2022 | published 11. 7. 2021

Summary

Onewheel Pint vertical stand for home use. Designed to hold the board vertical for storage/charging. Fits on the MINI.

Tags: [onewheel](#) [onewheelpint](#)

I really liked shk1d29's stand, but it would not fit on my Prusa Mini. So, I combined it with TH-Props to make an ultimate combo of the two. Identical to TH-Props's stand, but with the downward slopes to center & stabilize the board from shk1d29's design.

Note - This version is for a Onewheel without float plates or cobra pad.

Print Settings

Printer Brand:

Prusa

Printer:

MINI

Rafts:

No

Supports:

No

Resolution:

0.25

Infill:

20%

Filament:

Prusament PETG Carmine Red

Notes:

3 lines of shell and 14 top and bottom layers.

- Also, make sure to print on it's side for best strength. *ABS is probably best, but PETG is what I had on hand and it works fine.
